## AutoCAD

ObjectARX or ObjectARX.NET is an open source, C++ class library. It is used to create plugins for Autodesk applications such as AutoCAD, Revit, Autocad LT, Architectural Desktop, Project Managers, etc. A more recent major update is AutoCAD 2008. On the Windows platform, AutoCAD has COM support to use it as a desktop-based extension. An example of this use is the Autodesk 3D Warehouse, that is accessed from AutoCAD R14. Autodesk discontinued development of the AutoCAD application for the iPad, and instead released Autodesk DWF Viewer for iPad in August 2011. Other software In addition to the core AutoCAD product, the company offers various other products and services for a variety of needs. Map3D and Map3D Viewer, share the same functionality as AutoCAD Map 3D, but run in the Windows OS and are built upon a common core. The Map3D Viewer is also available for iOS, and as a 3D Warehouse service. Map3D Viewer is also available as a component of Autodesk Maya 3D Studio. AutoCAD LT, a simplified version of AutoCAD, is released for Windows and Mac OS X. It was introduced in 2001 as a "micro" version of AutoCAD. It is developed in collaboration with the Swedish company VOPUS and is an available hosted product on the Microsoft Technology Center website. Mobile apps AutoCAD Mobile, an iOS version of AutoCAD on the iPad. It has a simplified user interface compared to that of AutoCAD. This is because it is designed to be used as a drawing app, not as a CAD design tool. AutoCAD Mobile Pro, a version of AutoCAD designed for Windows Mobile devices. Keyboards The 2010 Autodesk Autokey comes with three programmable keys. To configure the programmable keys, open the AutoKey section of the Tools menu and select the "AutoKey" option. An AutoKey programmable key for CAD is selected by default. A number of other keyboards have been created by third parties. Many of these are not AutoCAD-compatible. Hardware support AutoCAD 2016 has been known to work with the following: Apple iMac models Apple MacPro models Apple MacBook Air models Apple MacBook a1d647c40b

Early life Stanton Warburg was born in London, the son of Alexander Warburg, a German banker, and his wife, Helen Darley. He was educated at Harrow School and Christ Church, Oxford, where he studied classics. Career Warburg started his theatre career as a clerk in London, but soon became a partner in Prince's Theatre, where he met and befriended Henry Irving. With his friend George Alexander, he helped Irving buy the Globe Theatre in 1896. In 1897 he was offered the position of managing the newly built Prince's Theatre, and in 1901 he was made Irving's assistant at the Lyceum Theatre. He later became manager of the Alhambra Theatre, and at the Gaiety Theatre from 1911. During World War I, he served as chairman of the United Kingdom War Savings Committee. Warburg bought up a large amount of early 20th-century art. In 1921, he published a book on the subject. In it he described his aims as being "... that the owner of a work of art should possess it solely because he desired it and solely because it was an expression of the 'expressionistic' view of man." He insisted that he never sold a piece of art to satisfy his own greed. He also believed in the 'collecting' rather than the 'appreciating' approach to art. He collected paintings, especially of horses, by Pablo Picasso, Georges Braque and Vincent van Gogh. He also collected modern European sculpture. His collection of antique sculpture was sold to the British Museum in 1922. It is now part of the Warburg Institute. The collection of modern sculpture was sold to the Bloomsbury group and is on display at the British Museum. A gift of Warburg's collection of over 1,000 rare texts, mostly by writers such as Shakespeare, Oscar Wilde, Edgar Allan Poe, George Eliot,
